About

Since my youngest age and because of drawing, I am a passionate graphic designer. Also very attached to the Japanese culture, I realized my dream to travel there after obtaining my Bachelor's degree.

After this personal enrichment, I have studied at the ESMI (École Supérieure des Métiers de l'Image) in order to make an artistic career. I discovered Graphic Design, in preparatory class, a field that seduced me instantly.

I graduated in Graphic Design in 2017 and since vary between freelance and partnership in a Startup to create a mobile application.
